Notes:

* None Reported (NR) because the compound exists at or below the detection limit of the method.

* None Detected (ND) because the compound was not detected.

¹ Product samples are tested as sold to patients, with no adjustment for water content.

² The sum of acidic and neutral values does not equal total potential content of a compound. To account for incomplete conversion of acidic to neutral compounds, the acidic value is reduced by a standard formula i.e., (THC-acid x 0.88) + delta9-THC = Total Potential THC

* Ingredients found in trace quantities, below physiologically significant levels, are not reported.
