**Notes:**

- \* None Reported (NR) because the compound exists at or below the limit of quantitation but above the limit of detection.
- \* None Detected (ND) because the compound exists at or below the limit of detection.
- \* Potency (SOP 020)
- \* Sample Condition deemed acceptable upon receipt by PhytaTech. Sampling done by outside party.
- \* Units of % are (mass/mass) and reflect numbers as a fraction of 100.

<sup>1</sup> The sum of acidic and neutral values does not equal total potential content of a compound. To account for incomplete conversion of acidic to neutral compounds, the acidic value is reduced by a standard formula i.e., (THC-acid x 0.88) + delta9-THC = Total Potential THC
